-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Mase et al. (2002/0197915).

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Mase (Figures 1-22) shows a connector having a housing 10 with a plurality of cavities 12 between front and rear ends and for accommodating terminal fittings 30, a retainer 40 with an elongate main body 41 with locking sections for engaging the

Art Unit: 2839

terminal fittings and a front wall 42 along the front end of the housing and through holes in the front wall aligned with insertion openings in the front of the housing, and a reinforcement (not numbered) projecting at angle from the front wall 42 and accommodated in a cutaway portion adjacent the front end of the housing with the cutaway portion exposing a first edge of the cavities. The retainer has two supports on opposite sides of the body and spanning the front wall with reinforcement coupled to the supports. The cavities 12 are arranged along an outer wall of the housing and have locks 13 in the first stage of the cavities. The connector has a bulge (not numbered) increasing the thickness of the front wall 42 and the reinforcement accommodated in the front of the housing. The terminal fittings are held at their front-limit positions by the bulge. The housing has guides for guiding surfaces of projections 45, 46 on the front wall of the retainer.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakamura et al. (6769934, 6716069 and 2003/0060075).
